

## Bug Report #1

Category	Label	Value
Bug ID	Bug ID Number	#001
	Title	Login page - Username First Letter Auto-capitalization
	Reporter Name	Zhumazhanov Adilbek
	Assigned Developer	-
	Date/Time Submitted	04.03.2024
	Assigned On	04.03.2024
Bug Overview	Summary	When entering a username in the login form, the first letter is always capitalized
	URL	http://testingchallenges.thetestingmap.org/login/login.php
	Screenshot	See sheet Bug #1
Environment		
	Operating System	Windows 11
	Browser	Google Chrome 122.0.6261.95
Bug Details	Preconditions	1. The user was created and saved in the database on the page via the link http://testingchallenges.thetestingmap.org/challenge10.php 2. The user is on the login page
	Steps to reproduce	1. Enter any username to the "Username" field
	Expected Result	All characters are identical to those entered by the user
	Actual Result	The first letter automatically becomes capitalized, even if the user entered it in lowercase
Bug Tracking	Severity	Low
	Priority	Medium
	Status	In progress
Notes		

## Bug Report #2

Category	Label	Value
Bug ID	Bug ID Number	#002
	Title	Login page – Password First Letter Auto-capitalization
	Reporter Name	Zhumazhanov Adilbek
	Date/Time Submitted	04.03.2024
	Assigned On	05.03.2024
Bug Overview	Summary	When you click on the eye icon to display the password entered in the password field, you can see that the first letter of the entered text has become capitalized.
	URL	http://testingchallenges.thetestingmap.org/login/login.php
	Screenshot	<a href="#">See sheet Bug #2</a>
Environment	Platform	Laptop (Huawei Matebook D15)
	Operating System	Windows 11
	Browser	Microsoft Edge 122.0.2365.80

Bug Details	Preconditions	1. The user was created and saved in the database on the page via the link http://testingchallenges.thetestingmap.org/challenge10.php 2. The user is on the login page
	Steps to reproduce	1. Enter any password to the "Password" field 2. Click on the eye icon inside the "Password" field
	Expected Result	All characters are identical to those entered by the user
	Actual Result	The first letter automatically becomes capitalized, even if the user entered it in lowercase
Bug Tracking	Severity	Low
	Priority	Medium
	Status	In progress
Notes		

### Bug Report #3

Category	Label	Value
Bug ID	Bug ID Number	#003
	Reporter Name	Zhumazhanov Adilbek
	Title	Login page - Incorrect Error Message Displayed
	Assigned Developer	-
	Date/Time Submitted	05.03.2024
	Assigned On	06.03.2024
Bug Overview	Summary	Authentication success message appears when incorrect credentials are entered
	URL	http://testingchallenges.thetestingmap.org/login/login.php
	Screenshot	<a href="#">See sheet Bug #3</a>
Environment	Platform	Laptop (Huawei Matebook D15)
	Operating System	Windows 11
	Browser	Google Chrome 122.0.6261.95
Bug Details	Preconditions	1. The user was created and saved in the database on the page via the link http://testingchallenges.thetestingmap.org/challenge10.php 2. The user is on the login page
	Steps to reproduce	1. Enter invalid credentials to the "Username" or/and "Password" fields 2. Click "Log In" button
	Expected Result	Unsuccessful authentication. Proper error message about invalid data displayed
	Actual Result	Unsuccessful authentication. Error message: "Username Not FoundLog In Successful" in the upper left corner displayed
Bug Tracking	Severity	Medium
	Priority	High
	Status	In progress
Notes		

## Bug Report #4

Category	Label	Value
Bug ID	Bug ID Number	#004
	Title	User registration page - No limit on the number of characters for the "Username" field
	Reporter Name	Zhumazhanov Adilbek
	Assigned Developer	Saule Bekzhan
	Date/Time Submitted	06.03.2024
	Assigned On	07.03.2024
Bug Overview	Summary	On the user registration page there is no limit on the number of characters that a user can enter in the "Username" field.
	URL	http://testingchallenges.thetestingmap.org/challenge10.php
	Screenshot	<a href="#">See sheet Bug #4</a>
Environment	Platform	Laptop (Huawei Matebook D15)
	Operating System	Windows 11
	Browser	Google Chrome 122.0.6261.95
Bug Details	Preconditions	1. User registration page is opened via the link http://testingchallenges.thetestingmap.org/challenge10.php
	Steps to reproduce	1. Enter more than 256 symbols with specials characters in the "Username" field
	Expected Result	There should be a defined limit on the number of characters allowed in the "Username" field
	Actual Result	There is no restriction on the number of characters that can be entered into the Username field. Users can input any number of characters.
Bug Tracking	Severity	Low
	Priority	Medium
	Status	In progress
Notes		Bug is actual for “Password”, “First Name” and “Last Name” fields as well

## Bug Report #5

Category	Label	Value
Bug ID	Bug ID Number	#005
	Title	Cross-browser issue - Unable to login using different browser
	Reporter Name	Zhumazhanov Adilbek
	Assigned Developer	Abzal Turekhanov
	Date/Time Submitted	06.03.2024
	Assigned On	07.03.2024

Bug Overview	Summary	The user was created in the Google Chrome browser and when trying to access the application through the Microsoft Edge browser, authentication was not successful
	URL	http://testingchallenges.thetestingmap.org/login/login.php
	Screenshot	
Environment	Platform	Laptop (Huawei Matebook D15)
	Operating System	Windows 11
	Browser	Google Chrome 122.0.6261.95 Microsoft Edge 122.0.2365.80
Bug Details	Preconditions	1. The user was created and saved in the database on the page via the link http://testingchallenges.thetestingmap.org/challenge10.php
	Steps to reproduce	1. Open Microsoft Edge browser. 2. Enter the valid username and password created in Google Chrome. 3. Click "Log In" button
	Expected Result	The user has successfully logged into the application
	Actual Result	Unsuccessful authentication. Error message: "Username Not FoundLog In Successful" in the upper left corner displayed
Bug Tracking	Severity	High
	Priority	High
	Status	In progress
Notes		

Bug Report #6

Category	Label	Value
Bug ID	Bug ID Number	#005
	Title	Login Page - Problem with translating text
	Reporter Name	Zhumazhanov Adilbek
	Assigned Developer	Zhibek Tazhenova
	Date/Time Submitted	06.03.2024
	Assigned On	06.03.2024
Bug Overview	Summary	When a language in the login page other than English is selected (French, German, Italian), the remaining languages name do not change to the selected language once selected.
	URL	http://testingchallenges.thetestingmap.org/login/login.php
	Screenshot	<a href="#">See sheet Bug #6</a>
Environment	Platform	Laptop (Huawei Matebook D15)
	Operating System	Windows 11
	Browser	Google Chrome 122.0.6261.95

Bug Details	Preconditions	1. The user was created and saved in the database on the page via the link <a href="http://testingchallenges.thetestingmap.org/challenge10.php">http://testingchallenges.thetestingmap.org/challenge10.php</a> 2. The user is on the login page
	Steps to reproduce	1. Choose a French language 2. Inspect a login page
	Expected Result	All text on the page should change to French
	Actual Result	Language names are not translated into French
Bug Tracking	Severity	Medium
	Priority	Medium
	Status	In progress
Notes		Bug is actual for German, Italian languages as well

Bug Report #7

Category	Label	Value
Bug ID	Bug ID Number	#007
	Title	User registration page - Duplicate User Registration Allowed on Registration Page
	Reporter Name	Zhumazhanov Adilbek
	Assigned Developer	Aruzhan Turkenova
	Date/Time Submitted	06.03.2024
	Assigned On	07.03.2024
Bug Overview	Summary	The registration page allows the creation of identical user accounts without proper validation, resulting in duplicate user registrations.
	URL	<a href="http://testingchallenges.thetestingmap.org/challenge10.php">http://testingchallenges.thetestingmap.org/challenge10.php</a>
	Screenshot	<a href="#">See sheet Bug #7</a>
Environment	Platform	Laptop (Huawei Matebook D15)
	Operating System	Windows 11
	Browser	Google Chrome 122.0.6261.95
Bug Details	Preconditions	1. The user registration page is opened via the link <a href="http://testingchallenges.thetestingmap.org/challenge10.php">http://testingchallenges.thetestingmap.org/challenge10.php</a>
	Steps to reproduce	1. Create first user with specific data 2. Create second user with absolutely the same data
	Expected Result	The page displays an error message indicating that a user with the same information already exists
	Actual Result	Second user is successfully saved to the database. No error is shown
Bug Tracking	Severity	High
	Priority	High
	Status	In progress
Notes		

Bug Report #8

Category	Label	Value
Bug ID	Bug ID Number	#008
	Title	User registration page - Registering using only spaces is allowed
	Reporter Name	Zhumazhanov Adilbek
	Assigned Developer	Alexander Frangov
	Date/Time Submitted	04.03.2024
	Assigned On	05.03.2024
Bug Overview	Summary	The user registration process permits the creation of user accounts with only spaces in the data fields
	URL	http://testingchallenges.thetestingmap.org/challenge10.php
	Screenshot	<a href="#">See sheet Bug #8</a>
Environment	Platform	Laptop (Huawei Matebook D15)
	Operating System	Windows 11
	Browser	Google Chrome 122.0.6261.95
Bug Details	Preconditions	1. User registration page is opened via the link http://testingchallenges.thetestingmap.org/challenge10.php
	Steps to reproduce	1. Enter any number of spaces to all input fields 2. Click to "Submit"
	Expected Result	The page should display an error stating that incorrect data has been entered.
	Actual Result	The registration process allows creating user accounts which consists only space characters in their account fields without any validation and error showing.
Bug Tracking	Severity	Medium
	Priority	High
	Status	In progress
Notes		

### Bug Report #9

Category	Label	Value
Bug ID	Bug ID Number	#009
	Title	Login page - Access granted with any credentials after initial login and logout
	Reporter Name	Zhumazhanov Adilbek
	Assigned Developer	Arman Utegenov
	Date/Time Submitted	01.03.2024
	Assigned On	05.03.2024
Bug Overview	Summary	The system allows access with any credentials after a successful initial login and exiting the page
	URL	http://testingchallenges.thetestingmap.org/login/login.php
	Screenshot	
Environment	Platform	Laptop (Huawei Matebook D15)
	Operating System	Windows 11

	Browser	Google Chrome 122.0.6261.95
Bug Details	Preconditions	1. The user was created and saved in the database on the page via the link <a href="http://testingchallenges.thetestingmap.org/challenge10.php">http://testingchallenges.thetestingmap.org/challenge10.php</a> through Google Chrome browser
	Steps to reproduce	1. Enter valid credentials and login to the application 2. Exit the main page and return to login page 3. Enter any credentials to the "Username" and "Password" fields 4. Click on "Log In"
	Expected Result	Unsuccessful authentication. Proper error message about invalid credentials should be displayed.
	Actual Result	Successful authentication. User proceeds to the main page.
Bug Tracking	Severity	High
	Priority	High
	Status	In progress
Notes		

## Bug Report #10

Category	Label	Value
Bug ID	Bug ID Number	#010
	Title	User registration page - Incorrect filling of data in the database
	Reporter Name	Zhumazhanov Adilbek
	Assigned Developer	Zhumabek Bashenov
	Date/Time Submitted	29.02.2024
	Assigned On	01.03.2024
Bug Overview	Summary	When creating a new user, fields such as "active", "created_on" and "created_by_id" are not auto-filled
	URL	<a href="http://testingchallenges.thetestingmap.org/challenge10.php">http://testingchallenges.thetestingmap.org/challenge10.php</a>
	Screenshot	<a href="#">See sheet #10</a>
Environment	Platform	Laptop (Huawei Matebook D15)
	Operating System	Windows 11
	Browser	Google Chrome 122.0.6261.95
Bug Details	Preconditions	1. The user registration page is opened via the link <a href="http://testingchallenges.thetestingmap.org/challenge10.php">http://testingchallenges.thetestingmap.org/challenge10.php</a>
	Steps to reproduce	1. Create new user with any data and save him
	Expected Result	"active", "created_on" and "created_by_id" fields are filled in automatically when creating a user
	Actual Result	"active", "created_on" and "created_by_id" fields are empty
Bug Tracking	Severity	Low
	Priority	Medium
	Status	In progress
